PROFESSIONAL SUMMARY

Full-Stack Web Developer with a strong interest in programming, web development, and Artificial Intelligence (AI). Experienced in building AI-powered web, desktop, and mobile applications, integrating LLMs into multi-provider systems through API gateways/proxies (OpenAI-compatible endpoints such as 9Router, OpenRouter, and Gemini), and developing REST APIs and various other technology-based projects. A collaborative team player who adapts quickly to new environments and challenges, and is committed to working professionally and responsibly in every task and duty.

WORK EXPERIENCE

Frontend Website Developer — Semarang City Office of Communication, Informatics, Statistics and Encryption Jul 2025 – Aug 2025

Hybrid

- Developed a modular and responsive website interface for the Semarang City Fire Department.
- Ensured 100% UI responsiveness across citizens' mobile devices and command-room desktops.

PROJECTS

ClipMax — Autonomous Desktop AI Video Clipper (Fullstack/AI Developer) 2026

<https://github.com/bagjasatrio/clipmax>

- Python desktop application that automatically converts long videos into 9:16 vertical clips using AI, featuring a Universal LLM Provider Gateway (9Router, OpenRouter, Groq, Gemini), Faster-Whisper (CUDA) transcription, MediaPipe face tracking, and FFmpeg NVENC rendering; backed by 85 automated tests.

ClipMax Mobile — On-Device AI Video Studio (Mobile Developer) 2026

<https://github.com/bagjasatrio/clipmax-mobile>

- Flutter/Dart application that turns long videos into short clips directly on-device, featuring a multi-provider Universal AI Router (Gemini, Groq, OpenAI, OpenRouter), native Whisper.cpp transcription (Dart FFI), and a 120 FPS multi-layer text/sticker video editor.

Job Application Automation & AI Career Co-Pilot (Fullstack/AI Developer) 2026

<https://github.com/bagjasatrio/job-apply-automation>

- Job application automation system built with Python, Google Gemini, and Playwright that runs a hybrid application flow (HR cold email and the LinkedIn, Glints, and Jobstreet portals), with ATS qualification-match screening (minimum 75% score), a scam-listing filter, and automatic generation of cover letters and tailored CVs.
- Includes Telegram Bot remote control, application tracker sync to Google Sheets, automated follow-ups, and 53 unit tests (Pytest).

TB.Losari-Jaya-2 Warehouse Management (Fullstack Developer) 2026

<https://github.com/bagjasatrio/TB.Losari-Jaya-2>

- Built a fullstack website for warehouse and point-of-sale management at TB.Losari Jaya 2.

CVKita - AI-Powered Career Profile & Resume Platform (Fullstack Developer) 2026

<https://cv-kita.vercel.app/>

- High-precision AI platform for career profile management and resume generation tailored to target job qualifications (Job Matching & ATS Optimization).

Online Game Top-Up and Electricity Token Website (Fullstack Developer) 2025

<https://github.com/bagjasatrio/starfallstore>

- Online game and mobile credit top-up website with API and payment gateway integration for fully automated transactions.

EDUCATION

Senior High School, Natural Sciences (MIPA) 2019 – 2022

SMA N 2 Brebes

GPA: 81.43

Bachelor of Informatics Engineering 2022 – 2026

Universitas Dian Nuswantoro

GPA: 3.29

SKILLS

FRONTEND ARCHITECTURE • API INTEGRATION • DATABASE & BACKEND SERVICES • DEVOPS • PROMPT ENGINEERING • AI-ASSISTED DEVELOPMENT • AI & AUTOMATION • LLM INTEGRATION & API GATEWAY • MOBILE DEVELOPMENT • MEDIA PROCESSING

LANGUAGES

English (Intermediate)

CERTIFICATIONS

Developing AI Applications with Python and Flask 2026

IBM

Python for Data Science, AI & Development 2026
